Skilled engineer constantly learning bleeding edge technologies to maintain a relevant knowledge base and skill set. Offers a diverse background in information technology with the ability to prioritize effectively and accomplish objectives with creativity.

Work Experience

Front-End Engineer (remote)

R4 Technologies

11/2016 – Present

+ Design, develop, and implement modular elements to a client portal application for multiple clients using TypeScript, D3, and a custom front-end framework based on ideas from Angular and React.

+ Daily SCRUM via Skype and ticket tracking through JIRA.

Web Software Engineer (Mid-Level)

Kapsch TrafficCom

11/2014 – 11/2016

+ Design, develop, and deploy JavaScript/Angular web applications to visualize millions of records of tolling data and provide the clients controls of various elements of their tolling solution.

+ Configure servers, write Jenkins build processes, and maintain codebases across multiple testing and production environments.

+ Handle user preferences, permissions, security, and authentication concerns.

+ Effectively communicate with management, middleware, and backend teams to make deadlines.

IT Professional

IBM

2008 – 2014

+ Provided highest tier desktop and network support for client base that included over 1000 clients at 10 locations across a 150-mile stretch.

+ Wrote VBScripts, HTAs, and batch files to automate as many repetitive tasks as possible.

+ Saved IBM roughly $25,000 on temp laborers for a lease rollover project by developing a process to single handedly complete the project while still completing my normal daily work load.

+ Finished 5 of the 6 years in the top 3 of the region regarding closed ticket count within SLA.

Educational Qualifications

Full Stack Web Development   MakerSquare (now Hack Reactor)   7/2014 – 10/2014
